# INVESTMENT OBJECTIVES AND POLICIES

The investment objective of the Fund is to replicate the performance of the FTSE® 100 Index (the “**Index**”), while minimising as far as possible the tracking error between the Fund’s performance and that of the Index. The Index is a market-capitalisation weighted index designed to measure the performance of the 100 largest publicly listed companies in the United Kingdom.

In seeking to achieve its investment objective, the Fund will aim to invest in the constituents of the Index in generally the same proportions in which they are included in the Index.

However, there may be circumstances when it is not possible or practicable for the Fund to invest in all constituents of the Index. Such circumstances may include (but are not limited to): (i) a limited availability of the Index constituents; (ii) trading suspensions on constituents of the Index; (iii) cost inefficiencies; (iv) if the assets under management of the Fund are relatively small, or (v) where there are internal or regulatory driven trading restrictions (as detailed in the “Investment Restrictions” and “Investment Restrictions - Other Restrictions” sections of the Prospectus) that apply to the Fund or Investment Manager but not the Index.

As a result of not investing in some of the Index constituents, the Fund may: (i) gain exposure indirectly through other assets or instruments (including, American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts which are certificates typically issued by a bank or trust company evidencing ownership of shares of a non-US issuer or financial derivative instruments (“FDI”)) which, in the opinion of the Investment Manager, will assist in achieving the Fund’s investment objective and are alternatives to directly purchasing the underlying securities included in the Index and/or (ii) hold the investible Index constituents in different proportions to the Index and/or (iii) invest in securities which are not constituents of the Index which, in the opinion of the Investment Manager, are expected to provide similar performance and risk characteristics to the uninvestible Index constituents and/or (iv) hold cash or cash equivalents.

All of the securities in which the Fund invests will be listed or traded on Recognised Markets, i.e. the London Stock Exchange for the Fund and as otherwise defined in the Prospectus. Accordingly, the underlying exposure is to the issuers of equity securities included in the Index. The indicative net asset value per Share of the Fund is available on at least one major market data vendor terminal such as Bloomberg, as well as on a wide range of websites that display stock market data, including [www.reuters.com](http://www.reuters.com). The Fund may avail of the higher investment limits allowed to certain index-tracking funds, as described at paragraph 4 of the section of the Prospectus headed “**Investment Restrictions**”.

The Fund may use FDI, including, but not limited to, futures, forwards, foreign exchange contracts (including spot and forward contracts), equity options, contracts for differences, certificates, notes and warrants which may be used to reduce tracking error between the Fund’s performance and that of the Index. These instruments may be used for efficient portfolio management of its assets. The primary policy of the Fund is to acquire securities included in the Index, as described above, but FDI may be used where the direct holdings of securities may not be possible or where tracking error can be better minimised by using FDI. To the extent that the Fund uses FDI, there may be a risk that the volatility of the Fund may increase. However, the Fund is not expected to have an above average risk profile as a result of its use of FDI. FDI will be used within the limits stipulated by the Central Bank of Ireland and as described in “**Use of Financial Derivative Instruments**” in the Prospectus. Accordingly, although FDI may be inherently leveraged, the primary purpose of the use of FDI is to reduce tracking error, and, although the Fund will be leveraged as a result of its use of FDI, the Fund’s global exposure (as prescribed in the Central Bank’s UCITS Regulations) relating to FDI, calculated using the commitment approach, must not exceed 100% of the Fund’s total Net Asset Value.

Efficient portfolio management refers to techniques and instruments which relate to transferable securities which fulfil the following criteria: They are economically appropriate in that they are realised in a cost-effective way and investment decisions involving transactions that are entered into for one or more of the following specific aims: (i) the reduction of risk (e.g. to perform an investment hedge on a portion of a portfolio); (ii) the reduction of cost (e.g. short term cash flow management or tactical asset allocation); and (iii) the generation of additional capital or income for the Fund with an appropriate level of risk, taking into account the risk profile of the Fund as described in this Supplement and the Prospectus and the general provisions of the UCITS Regulations. In particular, FDI may be used for the purpose of minimising tracking error, i.e. the risk that the Fund return varies from the Index return. Equity futures, index futures and currency futures may be used to hedge against market risk or to gain exposure to an underlying market. Forward contracts may be used to hedge or to gain exposure to an increase in the value of an asset, currency or deposit. Foreign exchange contracts may be used to convert the currency of the underlying investments of each Fund into the Base Currency and to hedge the dividends received in a currency other than the Base Currency between the ex-date and the pay date. Equity options may be used to hedge or achieve exposure to a particular market instead of using a physical security. Contracts for differences may be used to hedge or achieve exposure to a particular stock instead of using a physical security. Certificates may be used to achieve exposure to a stock or to a basket of stocks instead of using

a physical security. Notes and warrants may be used to achieve exposure to a particular stock instead of using a physical security.

The Directors may exercise all borrowing powers of the Company in accordance with the 'Borrowing Policy' section in the Prospectus. Such borrowing will be temporary and will not exceed 10% of the Net Asset Value of the Fund.

The tracking error is the annualised standard deviation of the difference between the monthly (or daily) returns of the Fund and the Index.

A series of factors may give rise to tracking error:

- Transaction costs, operating expenses, custody costs, taxes, as a result of changes in the investments of the Fund and re-weightings of the Index, corporate actions, currency fluctuations, cash flows into and out of the Fund from dividend/reinvestments and any costs and expenses which are not taken into account in the calculation of the Index.
- Internal restrictions, which may result in screening for any company involved in cluster munitions, anti-personnel land-mines, and depleted uranium shieldings and ammunition (as detailed in the Prospectus: INVESTMENT RESTRICTIONS - Other Restrictions) or

other market or regulatory driven trading restrictions that apply to the Fund but not the Index.

Moreover, in the event of the temporary suspension or interruption of trading in the investments comprising the Index, or of market disruptions, rebalancing the Fund's investment portfolio may not be possible and may result in deviations from the returns of the Index.

There is no guarantee that the investment objective of the Fund will be achieved. In particular, no financial instrument enables the returns of the Index to be reproduced exactly.

The anticipated tracking error is the expected standard deviation of the differences between the returns of the Fund and the Index.

As at the date of this Supplement, the anticipated tracking error for the Fund is expected to be up to 0.10% in normal market conditions. Divergences between anticipated and realised tracking error will be explained in the annual report for the relevant period.

The anticipated tracking error for the Fund is not a guide to future performance.

The volatility level of the Fund will have a strong correlation to the volatility level of the Index.

## INVESTMENT RISKS

Investment in the Fund carries with it a degree of risk including the risks described under "**Risk Factors**" in the Prospectus and the specific risk factors set out below. These investment risks are not purported to be exhaustive and potential investors should review the Prospectus and this Supplement carefully and consult with their professional advisors before making an application for Shares. Investment in the Fund is not for investors who can not afford to lose all or a significant part of their investment.

An investor should consider his/her personal tolerance for the daily fluctuations of the market before investing in the Fund.

### FDI

In the event the Fund uses FDI for efficient portfolio management or investment purposes, such use may increase the risk profile of the Fund.

For information in relation to the risks associated with the use of FDI, please refer to the "**Risk Factors – Particular Risks of Financial Derivative Instruments**" section of the Prospectus.

### The Index

An investment in the Fund exposes an investor to the market risks associated with fluctuations in the Index and the value of securities comprised in the Index. The value of the

Index can increase as well as decrease and the value of an investment will fluctuate accordingly. The Index is limited to securities listed on the London Stock Exchange and, as such, is less diversified than broader-based indices in terms of (i) industries, (ii) countries, and (iii) market capitalisation segments. Due to the limited numbers of securities comprised in the Index, the performance of the Index, and that of the Fund, is more susceptible to the risks associated with particular companies and a single economic, political or regulatory occurrence affecting these companies. There is no guarantee that the Fund's investment objective will be achieved. The Fund is subject to tracking error, as described in the Prospectus, which is the risk that its returns may not correlate accurately to those of the Index. Furthermore, any re-weighting of the Index may increase the risk of tracking error.

The past performance of the Index should not be seen as an indication of the future performance of the Index or the Fund.

## Dealing Timetable

<b>Cash Subscriptions – cut-off for receipt of cash</b>	By 15.00 (Irish time) within two Business Days after the Dealing Day.
<b>In-Kind Subscriptions</b>	In-kind subscriptions will be permitted on an exceptional basis where explicitly agreed in advance with the Investment Manager.
<b>Settlement of Shares subscribed for</b>	Within two Business Days following the Dealing Day, or such earlier day as the Directors may determine provided that appropriate cleared subscription monies for cash subscriptions (including the cash portion of an in-kind subscription where relevant) have been received no later than the settlement deadline of the relevant clearing platform or no later than 15.00 (Irish time) for wire transfers (or no later than such time as agreed by the Investment Manager for the Portfolio Deposit of an in-kind subscription where an in-kind subscription is agreed to be accepted by the Investment Manager). Subscriptions through either process must be effected on the same Business Day after the Dealing Day on which settlement is sought, unless this falls on a USD Foreign Exchange Market holiday, in which case they will settle on the Business Day after the USD Foreign Exchange Market holiday.

All payments should be clearly referenced with one payment per subscription trade.

On the relevant Dealing Day of the Fund prior to 25 December and 1 January, subscription application forms must be received by 12.00 noon (Irish time). Where a subscription application form is received after 12.00 noon (Irish time), the subscription shall be held over until the next Dealing Day.

## USD Foreign Exchange Market Holiday

The above cut-off times for receipt of cash and, where an in-kind subscription is agreed to be accepted by the Investment Manager, for receipt of Portfolio Deposit are to apply unless a

Dealing Day falls on a USD Foreign Exchange Market holiday in which case cash (including the cash portion of an in-kind subscription where an in-kind subscription is agreed to be accepted by the Investment Manager) should be received by the respective cut-off time on the Business Day after the USD Foreign Exchange Market holiday. Any cash received after 15.00 (Irish time) will be deemed as late settlement and will not be moved to the Fund account until the following Business Day. In such an event the investor shall indemnify the Company and the Administrator for any loss suffered as a result of the investor's failure to transmit subscription monies in a timely fashion. The Depositary is not liable for any loss suffered due to the late payment of subscription proceeds to the Fund.

# CONVERSIONS

A conversion request will be treated as a cash redemption request in respect of the original Class of Shares and as a cash subscription application in respect of the new Class of Shares in this Fund or in any other sub-fund of the Company. On this basis and provided the original Class of Shares and the new Class of Shares have the same base currency, Shareholders will be entitled on any Dealing Day to apply to convert any or all of their Shares of any Class in the Fund into Shares of another Class in the Fund or any other sub-fund of the Company except where dealings in the relevant Shares

have been temporarily suspended in the circumstances described in the Prospectus and where the Dealing Deadlines are different for the Class of Shares in the sub-funds of the Company being converted. Please refer to the terms and conditions regarding subscriptions and redemptions of the relevant Fund Supplements.

When requesting the conversion of Shares as an initial investment in a sub-fund of the Company, Shareholders should ensure that the aggregate Net Asset Value per Share of the Shares converted is equal to or exceeds any minimum

holding for the relevant sub-fund. In the case of a conversion of a partial holding only, the value of the remaining holding must also be at least equal to any minimum holding for the relevant sub-fund. If the number of Shares of the new Class to be issued on conversion is not an integral number of Shares, the Company may issue fractional Shares of the new Class or return the surplus arising to the Shareholder seeking to convert the Shares of the original Class.

Conversions will attract a Conversion Transaction Fee, being the fee payable to the Administrator as agent for the Company where, as part of a conversion of Shares, Shares are redeemed for cash and subsequently invested for cash in a different sub-fund of the Company. The fee payable is deducted from the redemption proceeds at the same rate as the Conversion Transaction Fee as specified in the relevant Fund Supplement of the subscribed for sub-fund.

## REDEMPTIONS

Shareholders in the Fund may effect a redemption of Shares at the Net Asset Value per Share less an appropriate provision for Duties and Charges on any Dealing Day, provided that a written redemption request is signed by the Shareholder and received by the Administrator no later than the Dealing Deadline on the relevant Dealing Day in accordance with the provisions of the **“Subscriptions, Valuations and Redemptions”** section of the Prospectus. Settlement for cash transactions will take place no later than two Business Days after the relevant Dealing Day. Redemption proceeds in either the Base Currency of the Fund or other local currency (at a competitive rate provided by the Administrator) will

be paid by telegraphic transfer to the appropriate bank account as notified by the redeeming Shareholder. The cost of any transfer of proceeds by telegraphic transfer will be deducted from such proceeds. Payment will be made only to an account in the name of the registered Shareholder. Settlement of in-kind transactions will take place within two Business Days of the relevant Dealing Day.

As per the provisions set out in the Prospectus, redemptions proceeds (in-kind and/or in cash) will only be released where the Administrator holds full original anti-money laundering documentation.

The Management Company will absorb (by reimbursement to the account of the Fund) any additional fees, costs or expenses over the Total Expense Ratio.
